

MARINA ELECTRICAL CONNECTION POLICY ADDENDUM FOR FIXED PILE MARINA

1. Background

This Addendum to the Derwent Sailing Squadron (DSS) Marina Electrical Connection Policy applies to vessels moored in the fixed pile marina. It has been considered necessary as the power availability and connection points in the fixed pile marina are inadequate to provide the full electrical connection service currently available in the floating marina.

The fixed pile marina has a limited supply of power and is a shared resource. Upgrading the main supply is not a viable option. The lack of access to a permanent exclusive power supply in this facility is reflected in the fixed pile marina pricing schedule.

It shall be the vessel owner's responsibility to comply with the Marina Electrical Connection Policy and this Addendum to that Policy.

The DSS reserves the right to inspect any vessel for compliance and to immediately disconnect and disable any non-compliant systems, with formal written notification provided to the user.

2. Use of Power Facilities on Fixed Pile Marina

- i. Fixed pile marina occupants may only connect power leads into existing power outlets while boat owners are on the boat. When not on the boat power leads shall be removed and stowed on the boat. For the avoidance of doubt this policy applies equally to all occupants, irrespective of residential status.
- ii. The exception to the above shall be that a fixed pile marina occupant may be granted permission to connect for a period of up to 24 hours when they are not on the boat for the purpose of charging of batteries only. Such permission would be expected not more frequently than monthly.
- iii. Power leads shall comply fully with the Marina Electrical Connection Policy.
